Beschreibung des Unternehmens

Die ODDO BHF SE zählt zu den führenden Adressen der unabhängigen Privatbanken Deutschlands. Unsere Kunden sind sehr vermögende Privatanleger, vorwiegend mittelständische Unternehmen sowie institutionelle Investoren. Wir haben uns der professionellen und individuellen Beratung verschrieben. An unsere Mitarbeiter stellen wir die hohe Anforderung, dass sie mit ihrem Arbeitsbeitrag und ihrer Persönlichkeit dieser Maxime entsprechen.

Stellenbeschreibung

Aufgaben

You will be part of the IT department supporting applications used by Information Security Risk Control and IT Operations teams.

Your role is to be part of both ongoing projects and run activities. The current roadmap aims at:

- Introducing new modules of the GRC-platform as well as supporting further improvements
- Supporting several other IT-initiatives of Information Security Risk Controlling and Cybersecurity-Operations

You will be a Business Analyst, managing the delivery, quality of service and supporting enhancements of the respective IT landscape by performing the requirements analysis, writing specifications and parametrizing the GRC-application to meet business requirements.

Exciting tasks await you:

Facing the business contacts / end-users in Frankfurt and Paris:

- Qualify, challenge and frame the needs directly with the operational business lines or their representative
- Design the features (UI / logic / data), and model functionally the system (sequence, dependencies...)
- Rationalization of business case, formalization of rational and preparation of synthesis for decision-making by top management
- Manage the governance committees (English), facilitate workshops
- Manage Incident process: qualification, functional analysis, coordination, resolution plan
- Manage change requests in accordance with the service budget and framework
- Design Workbreakdown structure, planning and budget management

Facing the developer teams in Tunisia and Frankfurt:

- Run Scrum Ceremonies
- Identification of architecture impacts, definition of target functional and technical architecture
- Create software architecture diagrams in "architecture as code"
- Write detailed functional specifications (User Stories)
- Provide functional support to developers
- Acceptance test and validation of functionalities
- Documentation of the functionalities

Facing Head of IT for ISM & IT Operations in Frankfurt:

- Project and progress reporting
- Reporting of alerts, risks and proposed solutions

Anforderungsprofil

Anforderungen

That's what inspires us about you:

- Completed studies in an engineering school or Master's degree in IT
- 5 years of experience working in a similar role
- Knowledge of Cybersecurity and Information Risk Management processes
- Sufficient IT-knowledge (IT-architecture, SQL, XML, Network, Container, Microservices...)
- Knowledge of data modelling and PowerBI (DAX)
- Excellent written communication, synthesis as well as interpersonal skills
- Communication skills, commitment, critical thinking
- Organizational skills, ability to work independently, sense of responsibility
- Fluent in English (mandatory), French or German is expected
- Already experienced on internal development following an Agile methodology
